

Assembly and Test Technician

Advent Aircraft Systems, Inc. is an established engineering and manufacturing company with a diversified aerospace customer base, a positive and professional working environment and modern facilities.

Job description

We are seeking to add an experienced, full-time assembly and test technician to our manufacturing and assembly and test team. Requires working with Engineering , Quality and Shipping/Receiving as required to accomplish assigned tasks. Assigned tasks include but are not limited to; assembly of aerospace components to printed work instructions; assisting with picking inventory items and documenting traceability; receiving inventory; preparation of outgoing shipments and other tasks, as necessary.

AS in an engineering or manufacturing discipline or equivalent education and experience in aerospace component MRO/manufacturing preferred. Two to five years in the aerospace AS9100 and ISO9001 manufacturing environment and an A&P License preferred.

Job Skills

- Use of hand tools and common shop equipment (such as a bench grinder, drill press and arbor press).
- Soldering, electrical harness assembly, work order kit building, lot tracking, shipment packaging, receiving inspection and order preparation.
- A basic understanding of DC electricity and hydraulic theory along with blueprint and wiring diagram reading.
- Electrical and hydraulic assembly experience.
- Ability to follow written and oral instructions.
- Needs to have the drive for accuracy in performing tasks with a “can do” mentality and work well in a team environment.
- Familiarity with use of MRP systems, basic math and MS Office skills

A person with most of these attributes will work because we can assist and train in any areas of weakness.

This position offers competitive hourly compensation and will require living and working in Tulsa, OK. Advent Aircraft Systems, Inc. provides generous medical, dental, vision, life and disability insurance and 401(k) benefits and an energetic, small business workplace environment.

Reliable transportation, a clean criminal background and the ability to pass a drug test is required.

Qualified candidates with a serious interest in this position should send an expression of interest and a resume with salary expectations to DeptHR@aircraftsystems.aero.
